INTRODUCTION

The two-year Master's programme offers you the opportunity to study organ in greater depth on the basis of a personally designed study plan. You can choose your own emphasis from a broad repertoire and you will develop your own professional identity. Source studies, the use of online databases, style analyses are just some of the facets that will underpin your personal quest. Throughout your studies, various workshops for all bachelor and master organ students will be organised. You will come together to learn about the construction of the organ and how to repair the basic elements. Student concerts take place annually, mainly in churches in The Hague, e.g. Evangelisch Lutherse Kerk, Oud Katholieke Kerk, Waalse Kerk and the Kloosterkerk

The traditional master-apprentice setting is very much alive in the organ department of the Royal Conservatoire. You will work very intensively with your organ teacher in one-to-one lessons as well as in a group setting. As students regularly act as a substitute for their teacher in church services, this means students effectively do an internship with their teacher and have one foot in the professional world already.

Master Project

In the Master of Music programme, you have the unique opportunity to create a Master Project with your own future in mind. A Master Project is an overarching term which combines the three domains of our master curriculum: **artistic development**, **research** and **professional integration**. As part of the curriculum, you will receive individual and group lessons in your main subject to aid you in your artistic development, you will conduct research on a topic of your own choice, and you will design and initiate your own professional integration activity. These elements and activities all come together in the Master Project. To help you develop your Master Project successfully, you will receive guidance and support from your instrumental/vocal teacher, research supervisor and professional integration coach. Additionally, you will take part in a peer group, in which you can discuss what you are working on. Designing your own Master Project gives you an opportunity to consider your future career and experiment with developing your own professional practice during your studies. When creating your Master Project, you should take into consideration whether it will help you find your place in the professional practice after you have finished your studies. We encourage you to collaborate, and therefore it is possible to do a Master Project together with other students.

Educational Philosophy

The educational philosophy of the Master of Music at the Royal Conservatoire enables you to develop your individual artistic vision, personal growth, inquisitive attitude, entrepreneurship and independence, while broadening your cultural horizon, as well as developing your instrumental and technical skills at a high qualitative level. We want our alumni to be excellent performers and composers, but also professionals who can reflect on their role in society, and know how to collaborate and navigate the complex realities of today's and tomorrow's music profession.

This Curriculum Handbook aims to provide you with all necessary information related to the curricula and courses of the Master of Music in Organ programme. After programme objectives and a schematic overview of the curricula, you will find descriptions of all courses, including learning goals (called 'objectives') and assessment criteria. We would advise you to also read the Royal Conservatoire's Master of Music Handbook and the Study Guide, which includes the Education and Examination Regulations (EER).

PROGRAMME OBJECTIVES

Below you will find a set of requirements which we call programme objectives. These are the minimum requirements that you need to meet in order to obtain a Master of Music degree from the Royal Conservatoire. Our programme objectives are based on the AEC Learning Outcomes (2017)¹, an international qualification framework developed by the European Association of Conservatoires (AEC), which is based on a broad consultation with institutions all over Europe and experts from the music profession. The objectives have been adapted where necessary to fit the study programme of our MMus in Organ.

The master programme objectives are divided in three categories: A) practical outcomes, B) theoretical outcomes and C) generic outcomes – and are numbered for ease of reference. The AEC Learning Outcomes refer to three cycles: 1st cycle (Bachelor), 2nd cycle (Master) and 3rd cycle (Doctoral). Therefore all master objectives start with the number 2. In the course descriptions, the field ‘programme objectives’ refers to these codes, e.g. 2.A.1, 2.B.5, 2.C.10. This means that the course contributes to obtaining the skills and knowledge described in those objectives. There may be several courses contributing to the same objectives.

At the end of the Master of Music in Organ programme, you:

COURSE DESCRIPTIONS

ARTISTIC DEVELOPMENT

MAIN SUBJECT

Course title:	Main Subject
Osiris course code:	KC-M-OR-HV
Course content:	<p>Students of this course receive individual lessons of 75 minutes or clustered into longer sessions. The lessons take place in different churches with the appropriate instruments. During the individual lesson, the student is coached by the teacher in order to learn all technical aspects and skills related to an informed stylistic approach of organ playing. Consequently organs of various types are involved in the education of the students. The study programme guides the student through the main repertoire so that the student can familiarise him/her-self with the performance in musical styles from the 16^h into the 21^h century, including improvisation. The teacher of the principal subject also organises regular group lessons in the format of a public performance (lunch concerts) where students evaluate the performance together. Peer learning takes place through assisting and doing the registration of the organ at recitals by fellow students and the teacher. Thus during the studies students are introduced to important Dutch organs. The focus is on the student's personal development, physical awareness and artistic growth into professional musicianship. The main subject Organ lesson includes improvisation and group lessons.</p>
Objectives:	<p>At the end of this course, you:</p> <ul style="list-style-type: none"> ▪ present yourself as a performer with a clear individual approach that stands for solid and reliable musicianship. The master's studies aim to explore the specific musical and technical qualities of a student beyond the basic professional demands; ▪ compose and realise a concert programme that shows resourcefulness by choices of repertoire and/or decisions in the performance. This programme as well as performance demonstrates a conscious relation to the relevant sources and defines your artistic profile against a background of contemporary early music conventions, as well as an understanding of the musician's position between the score and the (specialist and/or non-specialist) audience, often in an international multicultural environment; ▪ have developed a network of colleagues and organisations that you maintain as a starting point of further exploration into the future; ▪ realistically estimate your possibilities in the profession and understand the value of your initiatives in order to enlarge these possibilities; ▪ are able to act as your own teacher as a reflective practitioner by being able to assess and evaluate the quality of your performance, keep this quality up-to-date and develop it further by continuing to learn independently.
