INTRODUCTION

Composition is a highly intensive course which stands out for the loyalty and strong team spirit among the students and teachers. Many graduates of the Composition programme in The Hague have achieved worldwide fame, with their work being performed by prestigious ensembles at the leading opera houses, music festivals and venues all around the world. The faculty, once the birthplace of the revolutionary ‘Hague School’, concentrates on encouraging the creativity and versatility of the students, the conduct of research and helping students to discover their own identity as a composer.

During the course you will develop your own contemporary music practice and work with musicians in performances of your own creations. We devote a lot of attention to cooperation with creative spirits in other disciplines, improvisation and the use and development of (live) electronics. You will be able to study the production of music theatre and forms of interdisciplinary art, particularly in association with music theatre workshops, other art academies and numerous music ensembles. You will be required to manage a portfolio in which you keep a record of your activities during your studies, including your own concert recordings, programmes and reviews. In addition to acquiring a sound theoretical basis, you will gain practical experience by taking part in a great many internal and external projects. At the end of the fourth year you will give a presentation on the compositions you have produced during the course.

A specific form of education used in the Composition Department is informal education. This type of peer learning is extremely relevant and unique to our department. Outside of the lessons, students meet all the teachers, for example during projects, concerts and the Studium Generale. The result is an ongoing dialogue about quality, development and taste between students, their peers and teachers.

The Composition Department offers project-based education and has close ties with the professional field through its collaboration with ensembles such as New European Ensemble, Modelo62, Slagwerk Den Haag, Asko|Schönberg, the Nieuw Ensemble, Residentie Orkest, Ensemble Klang, Kluster 5 and with venues like Korzo, Studio Loos, Gaudeamus and the Nutshuis. The Composition Department organises numerous concerts that provide a platform for student performances outside the Conservatoire. The highlight is the annual Spring Festival, five days of non-stop performances of new compositions by the students in every conceivable genre and style. Every second year a leading international composer visits the school to give an intensive course. Guest lecturers have included John Adams, Hans Abrahamssen, Robert Ashley, Frederic Rzewski, Alvin Curran, Christian Wolff, Sylvano Bussotti, Richard Rijnvos, Jo Kondo, Magnus Lindberg and Kaija Saariaho.

Alumni of the Conservatoire’s Composition Department such as Michel van der Aa, Richard Ayres, Allison Cameron, Mary Finsterer, Sam Hayden, Yannis Kyriakides, Steve Martland, Missy Mazzoli, Kate Moore, Martijn Padding, Richard Rijnvos, Michael Smetanin, Fabian Svensson and Thom Willems have achieved worldwide fame and their work is performed by the most celebrated Dutch and international musicians, orchestras, ensembles and opera companies at all the prestigious music festivals and venues.

This Curriculum Handbook aims to provide you with all necessary information related to the curricula and courses of the bachelor’s programme in Composition. After Programme Objectives and a schematic overview of the curriculum, you will find descriptions of all courses, including learning goals (called ‘objectives’) and assessment criteria. We would advise you to also read the Royal Conservatoire’s Study Guide, which includes the Education and Examination Regulations (EER).

PROGRAMME OBJECTIVES BACHELOR COMPOSITION

Below you will find a set of requirements which we call programme objectives. These are the minimum requirements that you need to meet in order to obtain a Bachelor of Music degree from the Royal Conservatoire. Our programme objectives are based on the AEC Learning Outcomes (2017)¹, an international qualification framework developed by the European Association of Conservatoires (AEC), which is based on a broad consultation with institutions all over Europe and experts from the music profession. The objectives have been adapted where necessary to fit the study programme of our BMus in Composition.

The bachelor programme objectives are divided in three categories: A) practical outcomes, B) theoretical outcomes and C) generic outcomes – and are numbered for ease of reference. In the course descriptions, the field ‘programme objectives’ refers to these codes, e.g. 1.A.1, 1.B.3, 1.C.10. This means that the course contributes to obtaining the skills and knowledge described in those programme objectives. There may be several courses contributing to the same objectives.

Course content	<p>Bachelor 1: in the first year of the Bachelor Composition course you will receive group tuition together with the other B1 composition students. These group lessons are given every other week for a total of 3 hours of which the last hour is reserved for individual consultations. Tuition in the Group class focuses on the art of composing, with emphasis on compositional techniques, structure analyses, notation, reflections on Form, the development of the ear, sharpening your awareness of musical content and significance and developing your musical language and taste. A significant part of the group class will in this way also be devoted to exploring relevant contemporary repertoire. Through discussions with your peers and teacher you will obtain substantial insight into the methods and approaches of your colleagues. Alongside the B1 group class you will also be assigned an individual teacher with whom you will meet in the intermittent weeks.</p> <p>Bachelor 2-4: From the second year on you will receive individual tuition by two main subject teachers. Tuition occurs in the form of team teaching where you are allotted two main subject teachers with whom you will meet on alternating weeks. The individual lessons are almost always linked to your assigned projects and to a diversity of instrumental, vocal, electronic and/or interdisciplinary forms. Lessons are given in the context of relevant philosophical, cultural and social perspectives and focus not only on the development of your craftsmanship and musical language but also on your overall awareness and professionalism as an artist. Besides honing your individual skills as a composer the Bachelor course also places high emphasis on cultivating your practical skills in a wider sense through participation in the projects and through cultivating your skills in the area of production, coaching, publicity and all that is relevant to producing concerts of your own music (see also the Production and Publishing for Composers course). Studium Generale:</p>

	<p>An important component of the Composition main subject is the Studium Generale. This is a weekly group lesson for all students of the Composition Department (Bachelor and Master) which is facilitated by the composition teachers. In these lessons (inter)national guests are invited to give lectures about their work but the Studium Generale is mostly a platform for students to present their own work and research. The Studium Generale can also take a more practical form when ensembles present themselves and specific projects are initiated. The purpose of the Studium Generale is to give students ample opportunity to discuss musical matters as well as matters related to political, social or cultural issues which are relevant to society and which shape the framework in which artists work. The Studium Generale is a place where students can sharpen and finetune their views through discussions with their peers and teachers.</p> <p>Bachelor 3 and 4 students and Master 1 and 2 students are required to do at least one presentation per academic year. Other students (Bachelor 1 and 2, Erasmus students, PM students etc.) can sign up for a presentations if time allows. The Studium Generale is compulsory, is monitored weekly and attendance will feature in your overall assessment (Attendance 80%).</p>

Improv Lab

Course title	Improv Lab
Department responsible	Composition
OSIRIS course code	KC-CO-IL1-14
Type of course	Compulsory course
Prerequisites	Non applicable
Course content	<p>Improvisation and composition are inseparably linked. Under the guidance of Oscar-Jan Hoogland and various guest lecturers, students use improvisation to search for new sounds, forms of ensemble playing and new forms of communication through music. The improvisations can be free, but also (rigidly) structured on the basis of schemas, graphic scores or any other conceivable musical scenario. Students develop solo and group improvisation skills with a strong emphasis on the concept of counterpoint. They learn to improvise a composition as a group, with a clear structure that everybody is aware of. They learn to work at the intersection of improvisation and composition, from both the composers' and the improvisers' perspective. They learn to compose based on the input of the other people present. They are introduced to, and learn to make an efficient,</p>

	<p>so-called 'instant composers'-composition that consists of very minimal material but gives maximum result through using the creativity of the performers. They learn to lead a small ensemble in an experimental set-up. They are introduced to different schools of improvisation as present in different scenes, times and cities in order to obtain a 'non-singular' idea of what improvised and composed music can be. They connect the content of the class to their general practice as artists outside the class and bring that practice into the class. Improv Lab is a group lesson and a group process. The lesson consists mainly of playing (improvising) together and the verbal analyses of these results.</p> <p>This course includes the following exercises and assignments:</p> <ul style="list-style-type: none"> ▪ Block 1: counterpoint exercises for group improvisation, exercises in form-awareness and responsibility ▪ Blocks 2 & 3: working within the realm of specific scenes in the history of improvised music and reflection there upon: Berlin 90's and early 00's Chicago (Afro American music: Sun Ra and Art Ensemble of Chicago), Amsterdam (ICP duo Mengelberg Bennink), Tokyo (noise scene), New York (90's John Zorn Cobra) ▪ Block 4: the meeting of composition and improvisation: 1) studying and playing in class of compositions for improvisers 2) creating and playing in class of original compositions by the student.
Programme objectives	1.A.1, 1.A.5, 1.A.6, 1.A.7, 1.A.8, 1.A.10, 1.B.6, 1.B.9, 1.C.1, 1.C.4, 1.C.11
Course objectives	<p>At the end of this course, you:</p> <ul style="list-style-type: none"> ▪ can listen to each other and make musical decisions on the spot; ▪ realise the importance of the difference between composing and improvising (reflection in a split second versus large scale reflection); ▪ are able to use composition and improvisation to each other's benefit: improv as a laboratory for finding new sounds and interaction, and composing-strategies used as scenarios to improvise on; ▪ understand group-processes and learning to work with what your fellow artists have to offer rather than what you want them to do.

Sound Composition and Creative Technologies 1-2

Course title	Sound Composition and Creative Technologies 1-2
Department responsible	Composition
OSIRIS course code	KC-CO-ISS1-22; KC-CO-ISS2-22
Type of course	Compulsory course
Prerequisites	Sound Composition and Creative Technologies 1: none. Sound Composition and Creative Technologies 2: Sound Composition and Creative Technologies 1, or some experience with electronic/sound-based composition (each case will be examined on an individual basis).

<p>Course content</p>	<p>Traditional European instruments have undergone a wide expansion predominantly from the second half of the past century. The invention of techniques intending to extend their sonic possibilities, the introduction of new technologies and the acceptance of found objects as musical instruments offer the composer nowadays an enormous range of creative possibilities. During this hands-on course consisting of 2 parts, technology, philosophy and composition are key elements that will help you navigate this creative pool of possibilities. Understanding the nature of sound, technology and instrumental performance will allow you to develop ideas and perspectives about your individual artistic practice.</p> <p>Sound Composition and Creative Technologies 1 This first part of the course is devoted to developing a solid base in electronic studio techniques through creative compositional practice using the devices at the KC-100 electronic composition studio as the main laboratory for sound composition. During the course you will learn different studio techniques that will progressively help you to find an individual approach to every piece of equipment by determining their instrumental value in your compositional practice.</p> <p>Sound Composition and Creative Technologies 2 The second part of the course focuses on developing notions and concepts explored in the first part through a series of creative instrumental systems. During this course you will learn a wide range of tools and techniques allowing you to understand the nature of sound creation, problematising instrumental performance and exercising collaboration. All projects realised in this part of the course are focused on encouraging the reflection of fundamental notions such as what constitutes a musical instrument and the role of the performer within the current contemporary music repertoire. A substantial part of this course is devoted to individual advice towards the creation and production of a final presentation. Individual meeting times will be arranged with the instructor to develop final projects.</p>
<p>Programme objectives</p>	<p>1.A.1, 1.A.9, 1.A.11, 1.A.14, 1.B.10, 1.C.7, 1.C.9</p>
<p>Course objectives</p>	<p>At the end of this course, you:</p> <ul style="list-style-type: none"> ▪ have the knowledge and skills to operate the studio autonomously, while maintaining safe and purposeful conditions; ▪ are capable of speaking the language of engineers on whom the performance of your future work might depend; ▪ are aware of new possibilities as well as past developments in music technology; ▪ have gained sufficient practice on the nature and behaviour of sound as musical material; ▪ have acquired the knowledge through practice in order to develop a critical position on where your artistic practice and creative preferences are

	<p>aesthetically situated within the musical use of these techniques;</p> <ul style="list-style-type: none"> ▪ have exercised collaboration and exchange of ideas with colleagues and performers; ▪ have been confronted with fundamental musical questions, which even if you do not yet have the answers to, will help you to shape your artistic values.

Theory for Composers 1

Course title	Theory for Composers 1
Department responsible	Theory
OSIRIS course code	KC-TC-TVC1-17
Type of course	Compulsory course
Prerequisites	
Course content	<p>You will follow a personalised theory programme, in which the subjects taught, the balance between the modules and the level ultimately required and the results for each module depend on the entrance level, the total package and your envisaged artistic goal. The material is approached from the perspective of composing.</p> <p>The subject comprises the following components: Analysis: 1000 years of notated music</p>

	<p>Counterpoint: based on the fifteenth-century teaching of composition, built around composers such as Obrecht, Ockeghem and Josquin. An important element of this course is the practical approach; there is a lot of singing in the lessons, so that they incorporate the function of ear training.</p> <p>Harmony: divided into two elements: the analytical component is covered in the various classes on Analysis; the written component is taught in a separate class, which concentrates on the harmonic style of writing, in other words, with the focus on the principles of chord progression and voice leading.</p> <p>Ear training: intervals, chords, melodies. As separate objects (learning the names) but much more in (functional) relation to each other in the context of a composition. Referring to the canon of classical and contemporary art music, extracting exercises from them. Singing/sight-reading intervals and melodies or polyphonic structures. Rhythmical aspects are included as well.</p> <p>Year I: ear training, harmony and analysis Year II: ear training, counterpoint, harmony and analysis Year III: counterpoint and analysis of contemporary music</p>
Programme objectives	1.A.1, 1.A.6, 1.B.1, 1.B.2, 1.B.6
Course objectives	<p>At the end of this course, you:</p> <ul style="list-style-type: none"> ▪ can independently define musical building blocks (intervals, harmony, rhythm) on the basis of a solid theoretical foundation; ▪ can identify connections and structure in music from the perspective of historical theory; ▪ can interpret music from notation (harmony, counterpoint, analysis); ▪ have been trained in analysing while listening and singing from sheet music; ▪ have acquired the capacity to improvise polyphonic counterpoint as a performer singing in an ensemble with other students on the basis of sixteenth-century voice-leading rules.

Course title	Rejection Class
Department responsible	Composition
OSIRIS course code	KC-TC-AHMW2-11
Type of course	Compulsory course also available as elective
Prerequisites	Analysis Contemporary Music Basic
Course content	<p>The Rejection Class seeks to explore some of the fundamental ideas that lie at the basis of compositional choice and connects these to convergent ideas from the sciences, mathematics, musical theory, non Western cultures, visual arts and literature. The classes are built around four main pillars: 'Translation', 'Tuning', 'Form' and 'Engagement' and take place in the form of a presentation, discussion and application of ideas on the basis of relevant compositions and articles from ca. 1970 until the present day. Music is listened to, scores are studied, with an emphasis on aural analysis, and articles are read and discussed. Each Pillar ends with a class in which the students are asked to present and reflect on the topics either in relation to their own work or to the work of others.</p> <p>Large topics include among others: Lingua Franca & Identity, Numbers and Speech as compositional fundamentals, Tuning (basic introduction to all relevant terms, plus application in tuning systems), Vertical vs Horizontal microtonality (beating and ratios), Composing from Sound, the relationship between Form and Content, Single-line writing, Process and rhythmic counterpoint and Political and Environmental Engagement. The purpose of the class is to familiarize the students with a large, broad but singular repertoire, to heighten an awareness of the meaning and implications of ideas and help the students along their path towards determining their own goals.</p>
