# 1) General information

This is the Master Electives Handbook for the academic year 2023-2024 for Master of Music students of the Royal Conservatoire. Please read this handbook carefully, as it contains important information about the courses you can choose from and how to register for them.

For most master students, completing at least one Master Elective is compulsory. Please check if this is the case for you in the Curriculum Handbook of your specific master's programme. Most Master Electives take place in the second semester of the first year of your studies.

#### **1.1 CHOOSING A MASTER ELECTIVE**

#### Focus areas

Students are strongly encouraged to choose a Master Elective that is connected to their personal Master Project and/or research (see your Curriculum Handbook for more information). Via the diverse selection of courses contained in this handbook, the Royal Conservatoire offers students the chance to deepen their knowledge and skills in their chosen focus area.

Research in the master's programme is organised on the basis of the following nine focus areas:

- 1. Art of Interpretation
- 2. Instruments, Techniques and Technologies
- 3. Music in Public Space
- 4. Creative Processes
- 5. Beyond Discipline
- 6. Musical Training, Performance & Cognition
- 7. Aesthetics and Cultural Discourse
- 8. Co-creative and Educational Settings
- 9. Music Theory and Aural Skills

These areas are not mutually exclusive, which means that many Master Electives will be connected with more than one of them. Detailed descriptions of all Master Electives can be found in alphabetical order in Chapter 3 of this handbook. In every course description, you will see which focus area(s) the course is connected with most.

#### Attendance requirements and schedule clashes

Many Master Electives have an attendance requirement, which will be monitored and can result in a 'Fail' if it is not met. *We therefore ask you to carefully check the schedule of your preferred Master Elective(s) in Asimut before enrollment.* The schedule of courses offered by the Royal Conservatoire can be found in Asimut from September by typing the name of the course in the Asimut search bar.

#### Limitations

During your master studies, you get two chances to register for Master Electives: between 1 - 15November of your first year, and between 1 - 15 November of your second year. In your first year, you may register for up to two Master Electives (registering for a second Master Elective is optional and only possible if this course has sufficient capacity). In your second year, you can register for one Master Elective (if you already completed a Master Elective in your first year, this is optional and only possible if this course has sufficient capacity). It is not possible to register for more than three Master Electives during your studies. Please note that the ECTS received for a second or third Master Elective may not be used towards the minimum requirement of 120 ECTS necessary for completion of the master's programme and may not show on your final transcript, but will be registered in Osiris.

Not all courses in this guide are open to all students. For some courses, there are additional requirements or prerequisites, based on the content of the course. Apart from that, some courses are compulsory for students of certain departments or specialisations. If a course is already a compulsory part of your curriculum, you won't be able to choose it as a Master Elective. If applicable, more information about this can be found in the course descriptions in this handbook.

#### Please note: some Master Electives can only be followed in the next academic year

Most courses take place in the second semester of this academic year (between February and July 2024), but there are some exceptions. Some courses can only be followed as a Master Elective in the academic year 2024-2025 (next academic year). You can already register for these courses, but since their schedules are not yet known, there is a chance that you won't be able to follow them due to unforeseen schedule clashes. If this is the case, you can register for another Master Elective in November 2023. If a course takes place in the academic year 2024-2025, this is marked in red in the course description. Please only register for these courses if they are a good addition to your personal Master Project, or as a second Master Elective.

#### 1.2 ENROLLMENT AND REGISTRATION

#### Enrollment via Osiris in November

You can enroll for (a) Master Elective(s) via Osiris between **1** - **15 November**. Precise instructions about enrollment and registration will be published on https://denhaagkabk.sharepoint.com/sites/KCGeneral/SitePages/Master-electives.aspx.

*After 15 November 2023, enrollment and registration will be closed until November 2024. This means that if you haven't enrolled for a Master Elective by 15 November, you won't be able to follow any Master Electives this academic year, so please make sure to enroll for your chosen Master Elective(s) on time. If you change your mind about following a certain elective or if you enroll for the wrong elective by mistake, you will be able to change or withdraw your enrollment until 15 November. <i>After 15 November, it is no longer possible to change or withdraw your enrollment.* 

#### Selection

When enrolling via Osiris, you will be asked to submit your two preferred courses, in order of preference. If too many students submit a course as their first choice, Osiris will automatically register some students for the course of their second choice instead. You will receive an automatic confirmation telling you which courses you have been registered for some time after the enrollment and registration period in November.

For some courses, students will be selected on the basis of additional materials, such as a motivational letter. If this is the case for your preferred course, please enroll as early in November as possible in order to speed up the selection process. If applicable, information about this can be found in the course descriptions in this guide.

#### Credits

Please note that any additional ECTS offered by the courses or any credits received for a second Master Elective may not be used towards the minimum requirement of 120 ECTS necessary for completion of the master's programme, but will be registered in Osiris.

#### **1.3 EXEMPTIONS**

If you already have a master's degree or are pursuing a second study at another higher education institution then, in consultation with Head of Master Research Kathryn Cok, it may be possible for you to be granted an exemption for the Master Elective. You must submit your request for exemptions *before 15 November*. This exemption is not guaranteed, as it needs to be approved by the exam committee.

#### **1.4 QUESTIONS AND FURTHER INFORMATION**

This handbook and additional information about the registration process can be found on <u>https://denhaagkabk.sharepoint.com/sites/KCGeneral/SitePages/Master-electives.aspx</u>. For general questions about the Master Electives, please contact Roos Leeflang (Coordinator Master Research) at <u>r.leeflang@koncon.nl</u>.

If you have questions about registration via Osiris, please contact the Education Service Centre (<u>studentadministration@koncon.nl</u>).

If you have questions about a specific course, please contact the (main) teacher or relevant coordinator, whose e-mail address can be found in every course description.

### 2) Following a course at Leiden University

#### 2.1 ENROLLMENT AND REGISTRATION

In order to enroll for one or two Master Electives of the Academy for the Creative and Performing Arts at Leiden University, you have to register as a guest student at Leiden University *in addition to* registering for your chosen Leiden University course(s) via Osiris at the Royal Conservatoire. The deadline for doing this is **1 December 2023**.

Please register as a guest student by contacting Rogier Schneemann (<u>acpa@hum.leidenuniv.nl</u>) at the Academy for the Creative and Performing Arts (Leiden University). Make sure to include your name, student number and chosen Master Elective(s) in your e-mail.

After you have registered as a guest student, you will receive a letter from the University stating the required log-in details concerning your Leiden University account, known as your ULCN-account. You need this account in order to enroll for the Master Elective(s) through the online enrollment system called uSis.

After receiving your login details, you can enroll yourself for the course(s) you want to follow through uSis. In case your account details inadvertently are not available in time, you are advised to attend the course seminars without any delay and inform the lecturer about your ongoing registration as a guest student.

#### 2.2 TRAVEL EXPENSES

For information regarding compensation of travel expenses, please contact Kathryn Cok: <u>k.cok@koncon.nl</u>.

#### **2.3 FURTHER INFORMATION**

The course descriptions of the Master Electives by Leiden University that are open for students of the Royal Conservatoire can all be found in Chapter 3.2 of this guide. You can find more information about the Master Electives offered by Leiden University in their e-Prospectus: <u>https://studiegids.universiteitleiden.nl/en/studies/9814/electives-academy-of-creative-and-performing-arts</u>. The e-Prospectus course page will contain a link to the timetable, where you can select the relevant course. Make sure to check this before registering! Leiden University elective courses usually comprehend 5 ECTS. Only 3 of those credits can count as a Master Elective.

# 3) Course descriptions

#### 3.1 MASTER ELECTIVES OFFERED BY THE ROYAL CONSERVATOIRE

Course title	An Improvisatory Approach to Scores
OSIRIS course code	KC-M-EL-IAS
Type of course	Elective
Available to	The course is meant for main subject instrumentalists and
	singers from the vocal, classical and early music departments
Prerequisites	Non applicable
Course content	Historical evidence strongly suggests that the way pre- twentieth-century musicians dealt with scores differed considerably from the approach that became paramount after WW II. Whereas the modern interpretational paradigm attaches importance to utmost precision in an often literal reading of the musical text, earlier musicians seem to have understood music-making in a way that might be termed 'improvisatory'. Historical treatises and early recordings betray a focus on variety in music-making, as opposed to the sense of perfection and reliability that characterize the modern classical music practice. This variety may include extempore ornamentation, but also a much more flexible timing than is usual nowadays. In this course examples of historical treatises and recordings will be discussed, and you will be invited to explore the implications of such evidence in your own playing or singing. The focus of the course is on nineteenth-century music, but the principles extend to earlier music as well. You are expected to work actively on repertoire that will be chosen by mutual agreement.
Course objectives	At the end of this course, you will: - have acquired knowledge of and familiarity with a number of representative sources (texts, recordings) concerning this topic; - have developed a critical attitude that allows you to assess such sources and to have well-founded ideas about the relevance of historical evidence for modern practice; - have found a way to embed this knowledge into your own music-making, and are able to show this both in performance and in verbal communication.

Course title	Artistic Production
OSIRIS course code	KC-M-EL-AP
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	None
Course content	From the idea to a concept, from concept to recording, from
	recording to publishing. In this course, you will learn about the
	history of artistic production. You will work out ideas and
	concepts into production and recording plans and release these
	recordings.
	The following steps are part of the process:
	- create and shape ideas;
	- work out production concepts that follow the artistic idea;
	<ul> <li>producing and recording your music;</li> </ul>
	- shape your material into a published product;
<u> </u>	- release your production.
Course objectives	At the end of the course, you will:
	- have produced, recorded and published an artistic project;
	- have in-depth knowledge of the history of artistic production;
	- have knowledge of copyright and publishing issues;
	- be able to reflect upon the dialogue between artistic research
	and practice;
	- be able to show in which ways new knowledge is made
	available to others within the professional field.

Course title	Audiovisual Research Skills
OSIRIS course code	KC-M-EL-ARS
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	In our media-dominated time, communicating ideas and
	thoughts is of course not limited to words. The audiovisual
	medium can play a crucial role here, offering alternative
	possibilities to text, in terms of expressing meaning. The
	relevance of skills in using this medium is even greater in an
	artistic realm, such as music, which deals with tacit knowledge.
	This course aims at providing students with the essential
	knowledge and skills for audiovisual production, from
	developing ideas to recording and post production in the
	context of the "one man/woman band" artist/researcher.
	Furthermore, this course seeks to encourage students to
	(re)think their projects through audiovisual possibilities and
	helps them to utilise those audiovisual techniques to articulate
	issues and aspects of their research that are difficult or otherwise impossible to convey through text.
	During this course we will study some examples of the
	application of audiovisual techniques in research, such as video-
	articles and audiovisual examples on the Research Catalogue.
	Apart from that, students will become familiar with basic
	concepts in recording video and audio. We will try out various
	kinds of equipment (cameras, lenses, audio recorders,
	microphones) which can help us, as solo operators, to record
	video and audio. We will look at the post production process,
	and learn how to work with editing software in order to
	combine various types of visual material (images, videos, graphs
	and text) with audio (music, field recordings, interviews, etc.).
	We will also discuss the possible ways and platforms (such as
	YouTube, Vimeo and the Research Catalogue) for
	dissemination.
Course objectives	At the end of the course, you will:
	- have a good understanding of the affordances of audiovisual
	methods in artistic research;
	<ul> <li>be able to incorporate audiovisual methods in your own research practice;</li> </ul>
	- have a good understanding of DIY (do-it-yourself) media
	production processes;
	- have developed practical skills in recording video;
	- have developed practical skills in recording audio for video;
	- have developed practical skills in post production.

Assessment	This course is assessed using the following assignment. The
	assignment needs to be passed in order to pass this course.
Assignment	Assignment 1
Assignment type	An audiovisuel project
Assignment description	Aiming at a hands-on experience based approach, we look at each individual Master Project/research project and try to find out how each project can benefit from audiovisual means. Accordingly, each student receives an assignment to develop a short audiovisual project and present it at the end of the course.
Assignment requirements	You should have a significant contribution to the project, the ensemble and the audience experience for a sufficient grade.
Assignment planning	Around end of May (the exact date is to be discussed with the group).
Assessment criteria	Incorporation of the relevant audiovisual methods in relation to your own research practice. Communication of ideas/thoughts through the audiovisual medium. Recording and editing techniques (e.g. good quality audio and video).

Course title	Essential Writing and Research Skills
OSIRIS course code	KC-M-EL-EWRS
Type of course	Elective
Available to	M1
Prerequisites	B2 in English
Course content	This course will give you the opportunity to practice and
	improve your writing skills in English while developing your approach to academic research. The class is designed to help students with a particular interest in academic writing to
	deepen and focus their research objectives through effective planning, organization, and written communication. This will help you to better articulate your ideas and thereby produce
	written work more representative of a Master's level. Though maintaining a connection to practice, research will be approached from a scholarly perspective with particular
	attention to methodology and the construction of a well- supported and focused argument. This will be achieved primarily through a combination of short assignments, group
	sessions, and writing conferences where critical feedback will be given regarding your written work and overall research
	approach. Detailed questions of grammar, vocabulary, sentence structure, punctuation, and proof-reading will also be discussed. In addition, the importance of larger questions and
	related concepts such as writing style, organization, citation, and the structuring of content will be examined.
Course objectives	At the end of the course, you will:
	- have improved the focus and organization of your ideas;
	- have strengthened your command of sentence structure,
	punctuation, and grammar;
	<ul> <li>have expanded your vocabulary;</li> </ul>
	- have developed your revision skills by proof-reading, editing,
	and revising your own work as well as the work of others; - have improved your research skills with regards to accessing
	both online and offline sources;
	- have solidified your ability to organize and formally cite your
	sources using Chicago style, for use in publishing your work on the Research Catalogue or as a traditional document;
	- have produced a detailed working outline and introduction for
	your Master's research, in preparation for your final year.

Course title	Franco-Flemish Polyphony
OSIRIS course code	KC-M-EL-FP-20
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	
Course content	Non applicable
Course content	This is a joint international course offered in collaboration with the Alamire Foundation in Leuven (BE). In this course you will
	perform polyphony of the Franco-Flemish school, by composers
	such as Josquin, Willaert, Ockeghem, De la Rue, etc., from
	original sources of ca. 1500. You will receive coaching sessions
	in notation, solmisation, improvised counterpoint and repertory
	at the KC with Isaac Alonso de Molina, plus masterclasses with
	Stratton Bull (artistic director of Cappella Pratensis), including
	an intensive 3-day project in the 'House of Polyphony', Leuven.
Course objectives	At the end of this course, you:
	- are familiar with the repertory of the Franco-Flemish school,
	its importance within the musical heritage of the Low Countries,
	and its significance on a European scale;
	- can perform this repertory from original sources;
	- have developed a critical understanding of the role of original
	sources in historically informed performance of polyphony;
	- can translate this understanding into your own projects, both
	with original notation and with transcriptions.

Course title	Incompanying the Connection A Function
	Improvisation: From Score to Creation. A European
	Joint Module
OSIRIS course code	KC-M-EL-EJM
Type of course	Elective
Available to	Instrumentalists and singers from the Vocal, Classical and Early Music departments
Prerequisites	Previous experience in improvisation recommended
Course content	This module is constructed as a European Joint Module, which means it will be offered in collaboration by three institutions: the Royal Conservatoire The Hague, the Royal Conservatoire Antwerp and the Guildhall School of Music and Drama in London. These institutions have agreed on a joint content and pedagogical approach for this module on improvisation. This module has been developed in the framework of the European METRIC (Modernising European Higher Music Education through Improvisation) project on improvisation (see http://metricimpro.eu). The module presents multiple approaches to improvisation inspired by the repertoire. Projects within the module start from a reference/stimulus (a score, a film, a composition, a musical structure) and move towards an improvised creation. You will explore both solo improvisation and ensemble interaction. This course encourages creativity and the development of a personal voice
Course objectives	and the development of a personal voice.At the end of the course, you will have:
	<ul> <li>broadened your perspectives as a performer;</li> <li>explored different performance perspectives by means of improvisation (making the connection between formal insight and expression);</li> <li>acquired ownership of tonal/modal languages, forms and modes of expression;</li> <li>experienced different international pedagogical approaches.</li> </ul>

Assessment	This course is assessed using the following assignment. The assignment needs to be passed in order to pass this course.
Assignment	Assignment 1
Assignment type	Collaborative concert (recorded)

Assignment description	At the end of the course you will perform in a collaborative
	concert in which at least one of the ideas provided in the
	sessions will be used. The concert consists of group
	improvisations in which also individual initiative has to be
	visible. The concert will be recorded on video.
Assignment requirements	The final mark will be based on the assessment of the video
	registration by the 'local' teacher plus the visiting teachers, and
	the quality of your self-reflection + attendance results (80%).
Assignment planning	The recording will be made during the last scheduled class.
Assessment criteria	The assessment will be guided by the main categories of the
	METRIC assessment criteria:
	- musicality;
	- performance;
	- collaborative/ solo skills;
	- stylistic awareness.

Course title	MMus COMPOSITION / Music Multimedia
Department responsible	Composition
OSIRIS course code	KC-EL-MM
Type of course	Elective
Prerequisites	Non applicable
Course content	The aim of the course is to introduce students to how
	technology can be used in creating new forms of music
	multimedia/intermedia and expanded performance practices,
	from traditional contexts such as opera or contemporary dance
	to new contexts such as sound installation and new media. The
	history of early paradigms in composing with non-musical
	elements is analysed, as well as current practices in sound art
	and contemporary forms of multimedia. The course also takes a
	practical form, in learning technologies that could be useful in
	creating expanded performance practices, such as analogue and
	digital sound manipulation, video and basic interactive software programming.
Programme objectives	1.A.9, 1.A.11, 1.A.12, 1.A.13, 1.B.1, 1.B.10, 1.C.9
Course objectives	At the end of this course, you:

Course title	MMus MUSIC EDUCATION ACCORDING TO THE
	KODÁLY CONCEPT / Course Music Education according
	to the Kodály Concept
OSIRIS course code	KC-M-EL-KC
Type of course	Elective
Prerequisites	
Course content	Special interest in music education. A practical and theoretical course that consists of three main
course content	elements: methodology, musicianship and music teaching
	repertoire. International guest teachers will be invited at least
	twice a year. We will study music teaching strategies in the
	18th, 19th and 20th centuries, with a focus on Kodály inspired
	music education. The course is open for singers,
	instrumentalists and classroom (music) teachers.
Course objectives	At the end of the course, you:
-	- have a basic understanding of and are able to teach music to
	children according to the Kodály philosophy;
	- have an understanding of historical and pedagogical
	background of teaching music;
	- have an understanding of the musical learning process and are
	able to design music lessons in small and logical steps that lead
	to quality music making and understanding of music by children
	from the earliest ages;
	- are able to transfer musical content and musicality by means
	of your own voice, and are aware of the possibilities and
	impossibilities of the child's voice at certain ages:
	- are able to learn to read music well in order to imagine how
	difficult something is, for which age group a piece of music is suitable and where potential problems are;
	- are able to translate sound into music notation, and to
	understand musical structure and form;
	- have developed polyphonic skills to divide between the
	different layers of attention needed in musical activities and
	teaching music. You can translate these skills into lessons for
	children;
	- are able to integrate the theory and musicianship skills that
	are learned into your own teaching practices. You should be
	able to develop and structure lesson plans for your pupils that
	show a longer and clear line of learning in and through music.

<b>D</b>	Psychology of Musical Learning
Department responsible	Education
OSIRIS course code	KC-M-EL-TAP-22
Type of course	Compulsory course for TME students, available as a master elective to other students
Droroquisitos	Non applicable
Prerequisites Course content	This course focuses on specific characteristics of musical
	learning. Relevant scientific and psychological perspectives are being discussed as well as their practical implications. It will focus on the following topics: motor learning (skill acquisition), music learning and processing, embodied music cognition, performance preparation and practising. The latter will be
	addressed more extensively as practising is one of the main learning activities of musicians. The aim of teaching and coaching musicians how to practice is that they will be able to work with goals, are confident and intrinsically motivated and take an exploratory approach to music making. Besides theoretical perspectives, the implications and applications for learning and teaching music will be explored
	and discussed.

Course title	MMus NEW AUDIENCES AND INNOVATIVE PRACTICE /
	Introduction to Project Management
OSIRIS course code	KC-M-EL-IPM
Type of course	Elective (Compulsory for most Master of Music students; this course can only be followed as a Master Elective by students in the master programmes Theory of Music, Music Education According to the Kodály Concept, National Master Orchestral Conducting, and Ensemble Singing)
Prerequisites	Non applicable
Course content	This course will prepare you to design your own Professional Integration Activity (PIA). You will develop competencies and understanding of the skills required to effectively design, develop and realise artistic projects. The course consists of five seminars with accompanying assignments in which you will develop a plan for your Professional Integration Activity (PIA). You will be taught to create the following components that together will form a project plan: a brief description of your PIA that defines the values to be created, the quantifiable results and the goals, a product based planning, a budget, a risk analysis, a pilot/prototype in which you test the essence of your PIA, a pitch.
Programme objectives	2.A.1, 2.A.2, 2.A.3, 2.A.4, 2.A.5, 2.A.6, 2.A.7, 2.A.8, 2.A.9, 2.A.10, 2.A.11, 2.A.12, 2.A.13, 2.A.14, 2.A.15, 2.B.9, 2.B.12 2.C.1, 2.C.2, 2.C.3, 2.C.4, 2.C.5, 2.C.6, 2.C.7, 2.C.8, 2.C.9, 2.C.10, 2.C.11, 2.C.12, 2.C.13, 2.C.14, 2.C.15, 2.C.16
Course objectives	At the end of this course, you will be able to: - demonstrate an understanding of a variety of project management topics; - formulate your own professional goals; - create a brief description of an artistic project.

Course objectives	At the end of this course, you are able:
-	<ul> <li>to communicate about music in music, word or images;</li> </ul>
	• to explore to what extend music can be the carrier of
	meaning;
	• to be aware of what your body, your movement and your use
	of space communicate when you are on stage;
	• to influence this communication by working with the weight of
	the body and by working on force, speed and space within the
	movement of the body.

Course title	Playing or singing your own cadenzas in high barogue
	Playing or singing your own cadenzas in high baroque
	and classical repertoire
OSIRIS course code	KC-M-EL-WPC
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	In this course we will explore what 18th century musicians said about the practice of playing or singing cadenzas and how this compares to todays practices. This course seeks to provide tools on how to embellish those empty moments created by the composer. The objective of this course is to provide students with the knowledge and the tools to write and play or sing their own cadenzas. We will study 18th century compositions and treatises and we will discuss contemporay performances. There will be personal guidance and class discussions as to how to write and to play them.
Course objectives	At the end of the course, you will: - have an advanced understanding of the historical development of cadenzas in the discussed eras; - be able to write a stylistically informed cadenza for a composition of your choice; - be able to perform a cadenza on your instrument.

Course title	Practicing improvisation: A pre-idiomatic approach
OSIRIS course code	KC-M-EL-PIA-23
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	"Improvisation enjoys the curious distinction of being both the most widely practiced of all music activities and the least acknowledged and understood." Since Bailey (1993) wrote this statement, the field of improvised music has grown larger and gained more relevance in the academic sector. Improvisation is fairly acknowledged as a fundamental skill for the contemporary musician. However, due to the vast field encompassed, its general mechanisms and principles remain difficult to understand and systematize, especially when searching for personal vocabularies unbound to stylistic rules. In this course, we will dive into these mechanisms and principles, and examine the question of how we can develop a creative but systematic improvisational practice. The module addresses improvisation through a pre-idiomatic approach (unbound to specific styles and vocabulary). It offers concrete exercises to help the students develop the agency to improvise and integrate creative improvisational strategies in their musical practice. Throughout the sessions, we will focus on different musical elements (such as rhythm, melodies harmony, and sound) and disentangle them into their core components. This will provide the tools for creating thematically focused improvisations (skills application) as well as background knowledge to research and devise personal and coherent vocabularies (creativity and self-expression). The pre-idiomatic approach fosters cross-border improvisation, inviting musicians of different backgrounds to share and collaboratively create new languages and forms of expression. In this regard, the course also promotes peer learning and will invite the students to support each other to design specific ways of practicing improvisation related to different areas of interest. Throughout the sessions, the students will collaboratively compose pieces that will form the foundation for improvisational exercises. The
Course objectives	course will end with a final collective performance. At the end of this course, you will:
,	<ul> <li>have gained several tools to practice improvisation both on your own (self-sufficiency) and with peers (collaborative learning);</li> <li>have gained practical and theoretical insights that enable you to systematically include creative improvisational components into your practice;</li> </ul>
	<ul> <li>have developed the ability to improvise within a framework of your own choice (modal/tonal and free improvisation) and the understanding of why it works as such (creating a better connection between theory and practice);</li> </ul>

	<ul> <li>have a set of rhythmical, melodic, harmonic, and sound ideas you will be able to use to shape your own vocabulary and musical discourse;</li> </ul>
	- have developed a sensibility for listening and playing
	ensemble music while gaining more awareness of interactional
	strategies and group dynamics;
	- have explored the boundaries between improvisation and
	composition while developing the ability to integrate the two
	and move more easily from one to another;
	- have increased agency and awareness of your own artistic
	choices and learning processes;
	- have developed a broader perspective of the field of

Course title	Research and Improvisation Jazz
OSIRIS course code	KC-M-EL-RJ
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	For non jazz students: affinity with improvisation and/or jazz.
Course content	Research and improvisation will be discussed through four
	points of departure: practice, methods, historical backgrounds
	and literature. The sources will be examined by asking different
	questions like for instance: for what audience is it meant, are
	the intentions of the author fulfilled, is the book/article build up
	in a good way, or not? The students can form their own
	opinions through discussion about the ideas and thoughts
	presented in the literature.
Course objectives	At the end of the course, you will:
-	- have an advanced understanding of methods and books on
	improvisation;
	- be able to judge the sources used on value and
	appropriateness;
	- be able to form your own opinions on the sources.

Course title	Rhetorical Acting for Musicians: historical acting
	techniques to create persuasive performances
OSIRIS course code	KC-M-EL-HTM
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	<ul> <li>In this course, we will craft spoken and musical performances with the intent of engaging the audience's emotions and our own in a persuasive manner. We will investigate some of the principles of classical Rhetoric, learn how to put them in action, and also find out why they formed the backbone of acting and playing from the 17th- to the early 20th-century. Working within this framework, you will embody the teachings of countless artists from the past, and be able to enrich your own performances by posing questions such as:</li> <li>What are the practical implications of Rhetoric's main objective – to instruct, to please, and to touch the audience – for my playing?</li> <li>Can my emotional expressions be worked on and improved, and how would that knowledge help shape my musical choices?</li> <li>How does the choice of a stage persona or character influence my relationship with the spectator, and what are the physical traits by which it is perceived?</li> <li>This course offers 26 hours of practice-led explorations into 17th- to 19th-century sources on theatre, music, and painting,</li> </ul>
	through a rhetorical lens. Throughout the course, you will work on two monologues from the theatrical repertoire and act it before the class. The insights collected form these experiments will then be applied to one piece from your own repertoire, which you will commit to memory and perform to the class at the end of the course.
Course objectives	At the end of this course, you will:
	<ul> <li>- understand music compositions and music-making as persuasive means to guide spectators' thoughts and emotions;</li> <li>- be critical regarding your own emotions and their expression on stage;</li> <li>- be aware of your stage persona and find ways to adapt it to your intentions as a rhetorical player;</li> <li>- craft fully embodied performances specifically aimed at engaging the imagination of the audience;</li> <li>- have an overview of historical sources on rhetorical delivery and musical execution;</li> <li>- be able to place musical pieces within a broader artistic context.</li> </ul>

Course title	With and Beyond Music
OSIRIS course code	KC-M-EL-CPMP
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Motivation letter, max. 1 A4 page
Course content	This course explores the use of curatorial strategies in musical creation and/or the performance of music from the past and present. Curatorial practices and strategies consist in bringing together artworks, objects, spaces, ideas or discourses, and in establishing dialogues or relations between them. Widely popular in the field of visual arts and theatre, these practices allow artists to create new contexts and forms of presentation for their art that is connected to the world around them. In a series of modules that combine reflection and practical experimentation, you become acquainted with methods and theories on curatorship from different art forms and investigate notions of performativity and dramaturgy, programme notes, musical presentation in the digital world, as well as interactions between art and the everyday. The content of the course is flexible and adaptable to the interests of the students. The course includes ten weekly sessions of two hours, seven of which will take place online on Teams. Activities and assignements might include: <ol> <li>analysis of artistic productions such as staged concerts, archival art, performance-lectures, context-specific works, interventions in public space or composed theatre;             <li>analysis of relevant literature;             development of own curatorial concepts;             the production of texts;             sorial concepts;         </li> </li></ol>
	6. group visit to a concert or exhibition.
Course objectives	At the end of the course, you will: - be acquainted with curatorial strategies and methods from different art fields in terms of display, discourse, audience, context, social engagement, production and management; - be able to reflect critically upon the notion of curatorship in the analysis of existing work; - be able to develop own curatorial concepts; - be able to think music within broader social, cultural and/or political horizons.

Course content	This course offers an accessible introduction and overview of the multidisciplinary topic of music cognition, which deals with the perceptual and cognitive bases of performing, composing, and listening to music. Covered topics will include perceptual mechanisms underlying pitch and rhythm perception; interactions of musical processing with emotion, language, memory and movement; music acquisition processes and expertise; brain processes related to music and applications of music in health settings. Assignments will include engaging with the scientific literature, constructing a research proposal, and a final exam.
Course objectives	After this course, you will: - have a broad overview of the field of music cognition and its main relevant topics and findings; - have an understanding of musical building blocks that are relevant to perception, understanding and creation of music; - have an understanding of the methods by which music cognition research achieves its results; - have gained experience in creating your own research proposal; - have gained experience in interdisciplinary collaboration.

Course title	Music – Philosophy - Politics
OSIRIS course code	KC-KVL-MPO
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	"Art is moral in so far as it wakes us. But what if it does the opposite? If it anesthetises, sends us to sleep and opposes activity and progress? This too music can do, it understands the effects of opiates most essentially I do not exaggerate if I declare it to be politically suspect." (Settembrini in 'The Magic Mountain'. Thomas Mann)
	What is the link between music, philosophy and politics? What are the effects of musical-romantic dreams and of ghosts of the past on our contemporary society? Is there an aesthetics laying beneath the surface when a political system turns into spectacle and exaggerated media-exposure? What is the source of theatrical rhetoric of populistic ideologies, the rise of emotional identity-policies, the longing forabsolute leadership and mythologization of the nation? These and other questions will be discussed in this class.
	With this course we will trace this contemporary landscape back to its roots in romanticism. The Romantic era was a revolutionary era with intensified interactions between performing arts, music-aesthetics and national politics. In this context art and music acquired its modern meaning: anticipating and reflecting social instability, economic expansion, technological inventions, and the political turmoil that turned Europe into a circus of chaos and eventuallyin the 'great war'.
	How do we proceed in this cultural philosophy course? First by understanding these specific connections between music, literature, theatre, opera and later even film. We look at their role in culturally and politically defining a nation and at their rolein the usage of 'folkloristic' elements in narrations of history.We will also look at music's ability to mobilize 'spirit' and its usage in war and for expressing protest. Here is the dubious nature of music, its vicious effects and even politically suspicious character
	We'll focus on concepts such as nationalism, authenticity, popular art and aesthetic criticism, identity, culture of power and the 'mimetic' power of culture, ideology, propaganda and autonomy. Special emphasis is put on the double role of aesthetics: on works and events as perceptive medium for supporting ideological and political ideas — and as an artistic force of social-cultural liberation and political criticism.
Course objectives	At the end of the course, you will:

	'politicizing aesthetics and aestheticized politics' and on their
	effects in contemporary political ideas, discourses and
	performances;
	- be able to reflect with some historical background and to
	situate your activities as a teacher and professional
	musician/pedagogue within a diversity of sectors of
	contemporary culture;
	- be able to comprehend some crucial texts of philosophers,
	writers, composers filmmakers and performers; - have developed a historical sensibility for interdisciplinary and
	intermediary in contemporary art.

Course title	Music x Technology
OSIRIS course code	KC-KVL-MXT
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	The main topic of this course is the question how technological developments have resulted and will result in new forms of
	music. However, the relationship between technology and music is not just one-directional, technology has been shaped by developments in music as well. In this course we are
	primarily interested in music creation including composition processes, musical language and musical instruments or sound sources. Besides that, we are interested in developments in musical performance, presentation and distribution.
	The course will address both academic, contemporary and popular electronic music. We will address the democratization of electronic music, the role of the internet, automatic music recognition, generative music and artificial intelligence.
	In the course we will come across instruments like the Theremin, the Trautonium, the Mellotron, analogue synthesizers (Moog, Buchla, Arp, EMS), digital synthesizers while not forgetting the studio-based electronic music tradition that originates from the 1940's.
	In order to develop hands on experience we will use and zoom into the following open source software (Audacity, VCV Rack, Ardour, Pure Data, Automatonism, Google Magenta and more)
	In the course a historical perspective will be created to not only create a context for discussion, it is meant to inspire new ideas and concepts. Although history plays an important role it is not a history course. Students are asked to study certain concepts that relate to their interest, try-out their ideas, present their work and engage in discussions.
Course objectives	<ul> <li>The course aims to create a stimulating basis for critical thinking regarding the interrelation of Music and Technology</li> <li>The course aims to stimulate the creation of new ideas and concepts focusing on the interrelation of Music and Technology</li> </ul>

Course title	Popular and Global Music
OSIRIS course code	KC-KVL-PGM
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	With the opening of the transnational media market in the
	1950s, the American popular song reached new audiences on an unprecedented scale. Elvis Presley, Chuck Berry, Bill Haley, and many others, became the icons of a new global space of interaction. The rest is history: the British Invasion, punk music, hip hop, and so on—all flagships of the global music industry today. But is this global dimension all there is to popular music? From the Latin popularis, popular means prevalent among the people. By that standard, many other musical materials worldwide should be labelled popular too. In this course, students explore the tension between the definitions of popular and global by examining diverse repertoires with a focus on formal features and social practices. Said materials include several styles of rock, pop and dance music, as well as traditions from Asia, Africa, Europe and the Americas.
Course objectives	<ul> <li>By the end of the course, you will:</li> <li>be able to compare central concepts in contemporary music categorisation, such as popular and global;</li> <li>be able to analyse popular songs using the method of Embodies Musical Analysis;</li> <li>be able to recognise and compare formal features of diverse musical styles with an emphasis on rhythm;</li> <li>be able to interpret their own musical experiences from a critical standpoint and in awareness of prevalent metanarratives;</li> <li>explain the role of legal, economic, and technological factors in the development of popular and global music.</li> </ul>

Course title	Values in Music
OSIRIS course code	KC-KVL-VIM
Type of course	Elective
Available to	This elective is available to all master students
Prerequisites	Non applicable
Course content	Music is an object of aesthetic appreciation. Different types of music compete for the interest of concertgoers and music consumers. Music also plays an essential role in everyday life: it accompanies people while travelling, exercising, shopping or working. It is also increasingly used as a tool in health care, education, mental training or community building. However, music is not only highly valued as a product or a tool. It also forms in itself a field where values are constantly negotiated artistically. Values of form, sound, expression and
	interaction are fundamental to the emergence of musical features and characteristics. To what extent are these values to be considered musical? Is valuation in music only a matter of personal taste, or do values in music above all reflect social norms, power relations and cultural identity? Conversely, do we recognise musical values in the world around us? Can developments in the musical field impact styles of conduct, social norms and interaction?
	This course starts from the premise that art music offers a playground where we can imagine and experience 'living today' in manifold ways. Close listening to its features is, therefore, key to a better understanding of the dynamic relation between cultural expressions and social context. This course will focus mainly (but not exclusively) on non-pop musical genres and niches in which music acts not only as a mirror but also as a field of exercise and experiment and, as such, an active and constitutive element of society.
Course objectives	In this course, you will: - relate features of art music to esthetical, ethical and societal values; - broaden the musical horizon and develop differentiated listening perspectives to art music;
	<ul> <li>learn to talk and write about music, based on personal listening experience, aural analysis and informed by historical, philosophical and sociological discourse;</li> <li>understand motivations for art music creation, production and consumption;</li> <li>understand different roles, functions, and positions of art music in contemporary society.</li> </ul>
